Hiring Team, Health Information Systems
Sunnybrook Health Sciences Centre

Re: HIS Specialist, Project REACH (2026-19226)

Dear Hiring Team,

I'm applying for the HIS Specialist role on Project REACH. I'm a physician by training (MBBS) and spent the last four years as a Clinical Advisor at Greenway Health, helping clinics get live on their EHR and then use it well. That mix of clinical background and hands-on system work is what I'd bring to your team.

At Greenway I trained more than 200 providers, nurses, NPs and medical assistants across client implementations, and I stayed involved after go-live to sort out workflow problems as they came up. I also wrote product requirement documents and took part in user acceptance and system integration testing, so I'm comfortable turning what clinicians say they need into something a build team can act on. I track work in MS Project and SharePoint.

Before that I worked in ICU and emergency medicine, so I know what a busy clinical unit looks like and why a clunky screen costs time that staff don't have. I think that helps when you're sitting with a unit during training or deciding what to fix first.

I'm available for weekday day shifts at Bayview and would be glad to talk about how I can support REACH. Thank you for your time.

Sincerely,
Sampreeth Wadhwa
