Dr. Sampreeth Singh Wadhwa

Healthcare Implementation and AI Delivery Lead | EHR Rollouts, Clinical Workflows, Applied AI | MBBS-Trained Physician

Fort Erie, Ontario, Canada | sampreethwadhwa@gmail.com | linkedin.com/in/sampreethsingh | Portfolio

SUMMARY

MBBS-trained physician with four years at Greenway Health, a US healthcare software company, where I ran implementations for close to 200 client practices from discovery through go-live and adoption, as the client's main contact. I was the clinical lead on Greenway's AI-first EHR, and I build AI products hands-on: I founded Roovero, an AI content SaaS with paying pilot clients, and I grade and stress-test frontier models on clinical tasks. I translate how clinical teams really work into scope that engineers can build from, and I keep stakeholders aligned through launch.

CORE SKILLS

- **Delivery:** managing several implementations at once, discovery, workflow and scope documentation, timelines and risk tracking, go-live and adoption, client communication
- **AI and technical:** AI-first EHR clinical lead, LLM evaluation and rubrics, AI-assisted build (Claude Code, Codex), webhooks and billing integrations, React prototyping
- **Clinical:** clinical workflow design, defect triage, patient safety review, stage-gate release, emergency, ICU and inpatient care

HEALTHCARE SOFTWARE AND AI DELIVERY EXPERIENCE

Clinical Advisor, Greenway Health Aug 2022 – Oct 2026 | Remote

- Ran EHR implementations for close to 200 client practices, many at the same time, from discovery and workflow documentation through configuration, go-live and adoption, as the client's main clinical and solutions contact.
- Ran discovery with each practice to document pain points, current workflows, business processes and goals, then designed and configured practice-specific workflows and widgets.
- Clinical lead for a new AI-first EHR from Aug 2025: defined provider personas, mapped end-to-end clinical workflows and built React prototypes before engineering handoff.
- Wrote PRDs and feature requests from recurring client pain points and worked with product teams to get them built; many shipped to clients.
- Trained 200+ end users, including providers, nurse practitioners, nurses and medical assistants, on the new workflows.
- Triaged defects and patient safety issues from detection through stage-gate release as a member of the Patient Safety and Functional Advisory Committees.
- Presented to clients and at the Greenway Engage provider conference.

Founder and Product Lead, Roovero Dec 2025 – Present

- Took an AI content SaaS for small businesses from discovery to launch; now serving paying pilot clients and iterating on their feedback.
- Own requirements, AI architecture and the hands-on build (Flutter, Firebase, Next.js) using Claude Code and Codex, including billing and webhook integrations.
- Work agentically: write the PRD, functional design and technical design documents first, then have AI agents build from them. The support system runs on a RAG pipeline.

AI Evaluation (Freelance), Outlier Dec 2025 – Present

- Write clinical prompts and expert reference answers, build scoring rubrics, and grade and compare ChatGPT, Gemini and Claude responses for clinical accuracy and task requirements.
- Design questions that challenge frontier models on clinical workflows and simulated scenarios, documenting where responses help and where they fail.

CLINICAL EXPERIENCE

- **Senior Resident, Emergency Medicine, Aster CMI**, Bengaluru (Apr 2021 – Jul 2022): quaternary care, Level 1 trauma centre.
- **ICU Registrar, HBS Hospital**, Bengaluru (May 2020 – Jan 2021): COVID ICU; trained 12+ nurses.
- **Occupational Health Physician, Ranger OH Clinic** (Jan – Apr 2021): wrote SOPs; trained 500+ people in emergency and safety protocols.
- **Teleconsultation Doctor, TATA 1MG** and freelance physician, India (Nov 2020 – present): virtual and in-person consultations, chronic disease management.

EDUCATION

MBBS, Kempegowda Institute of Medical Sciences (KIMS) 2020 | Bengaluru, India
