SUMMARY

MBBS-trained physician with four years at Greenway Health designing and delivering EHR training and helping practices adopt new workflows. I documented current and preferred clinical workflows for close to 200 client practices, configured practice-specific workflows, and trained 200+ end users, from providers to medical assistants. Earlier, as an occupational health physician, I trained 500+ people and wrote SOPs, and as an ICU registrar I trained nurses during COVID. I bring clinical credibility and training craft to adoption work.
