Dr. Sampreeth Singh Wadhwa

Associate Product Manager | Clinical and Regulated Health Technology | MBBS-Trained Physician

Fort Erie, Ontario, Canada | sampreethwadhwa@gmail.com | linkedin.com/in/sampreethsingh | Portfolio

SUMMARY

MBBS-trained physician with four years in health software at Greenway Health. I write PRDs from recurring client pain points, work with product, engineering and clinical teams through release, and train users on what ships. I also founded Roovero, an AI SaaS product I take from requirements through build and iteration with paying pilot clients. I'm early in formal product titles and strong on clinical judgment, requirements and cross-functional follow-through.

CORE SKILLS

- **Product:** requirements, user stories, prioritisation, prototyping, release coordination, launch readiness, stakeholder alignment
- **Clinical and regulated:** patient safety triage, stage-gate release, clinical content, clinical workflows
- **Build:** React, GitHub, n8n, AI tools (Claude, ChatGPT, Gemini)

PRODUCT AND AI EXPERIENCE

Founder and Product Lead, Roovero Dec 2025 – Present

- Took an AI content platform for startups and small businesses from problem discovery through launch; now serving paying pilot clients and iterating on their feedback.
- Own strategy, requirements, AI architecture and hands-on build of the Flutter/Firebase app and Next.js site, using Claude Code and Codex to move from idea to working software quickly.
- Built website and PDF ingestion that generates brand profiles, plus 30-day content calendars with a user-approval step in the workflow.
- Integrated and routed multiple AI models (Claude Sonnet, Imagen, Veo, ElevenLabs) and Instagram Graph API publishing, comments and insights.
- Use performance data to iterate on model routing, prompts and content strategy; implemented subscription billing and webhooks and led go-to-market.
- Work agentically: write the PRD, functional design and technical design documents first, then have AI agents build from them. The support system runs on a RAG pipeline.

Clinical Advisor, Greenway Health Aug 2022 – Oct 2026 | Remote

- Clinical lead for a new AI-first EHR from Aug 2025: defined provider personas and user goals, mapped end-to-end clinical workflows and built React prototypes before engineering handoff.
- Wrote PRDs and feature requests from recurring client friction, and worked with product teams to get them built; many shipped to clients.
- Triaged defects and patient safety issues through stage-gate release as a member of the Patient Safety and Functional Advisory Committees and the Clinical Content Team.
- Owned implementations for close to 200 client practices and trained 200+ providers, nurse practitioners, nurses and medical assistants on new workflows.
- Presented product concepts to clients and at the Greenway Engage provider conference (50 attendees).

AI Evaluation (Freelance), Outlier Dec 2025 – Present

- Write clinical prompts and expert reference answers, build scoring rubrics, and grade and compare ChatGPT, Gemini and Claude responses for clinical accuracy and task requirements.
- Design questions that challenge frontier models on clinical workflows and simulated scenarios, documenting where responses help and where they fail.

Founder, Pawlentine Beta testing (iOS and Android)

- Defined personas, user journeys and prioritisation for a pet social and matching app; building it hands-on with an analytics agent and event tracking. The support system runs on a RAG pipeline.

CLINICAL EXPERIENCE

- **Senior Resident, Emergency Medicine, Aster CMI**, Bengaluru (Apr 2021 – Jul 2022): quaternary care, Level 1 trauma centre.
- **ICU Registrar, HBS Hospital**, Bengaluru (May 2020 – Jan 2021): worked under a senior doctor in the ICU, treating COVID-19 and other ICU patients; bedside echo, USG, intubation and central lines; trained 12+ nurses.
- **Occupational Health Physician, Ranger OH Clinic** (Jan – Apr 2021): factory occupational health centre, seeing 150 to 200 patients a day; wrote SOPs; trained 500+ people in emergency and safety protocols.
- **Teleconsultation Doctor, TATA 1MG** and freelance physician, India (Nov 2020 – present): virtual and in-person consultations, chronic disease management.

EDUCATION

MBBS, Kempegowda Institute of Medical Sciences (KIMS) 2020 | Bengaluru, India
