Dr. Sampreeth Singh Wadhwa

Healthcare Product Builder | SaaS and AI-Powered Care | MBBS-Trained Physician

Fort Erie, Ontario, Canada | sampreethwadhwa@gmail.com | linkedin.com/in/sampreethsingh | Portfolio

SUMMARY

Healthcare product builder who has spent four years at Greenway Health working directly with customers and product teams on a cloud EHR, and now runs Roovero, an AI SaaS product I took from discovery to launch and iterate with paying pilot clients. At Greenway I wrote PRDs from recurring customer problems, worked with product and engineering to get them built, and served as clinical lead for a new AI-first EHR. MBBS-trained physician, so I understand how care is delivered and where software gets in the way.

CORE SKILLS

- **Product:** customer discovery, user research, personas, PRDs and user stories, backlog prioritisation, prototyping, stakeholder alignment, product launch and iteration
- **Healthcare and AI:** EHR workflows, clinical documentation, patient safety review, agentic workflow scoping, prompt design, evaluation rubrics, RAG-based support
- **Build:** React, Flutter, Firebase, Next.js, Claude Code, Codex, GitHub, n8n

PRODUCT AND AI EXPERIENCE

Founder and Product Lead, Roovero Dec 2025 – Present

- Took an AI content platform for startups and small businesses from problem discovery through launch; now serving paying pilot clients and iterating on their feedback.
- Own strategy, requirements, AI architecture and hands-on build of the Flutter/Firebase app and Next.js site, using Claude Code and Codex to move from idea to working software quickly.
- Built website and PDF ingestion that generates brand profiles, plus 30-day content calendars with a user-approval step in the workflow.
- Integrated and routed multiple AI models (Claude Sonnet, Imagen, Veo, ElevenLabs) and Instagram Graph API publishing, comments and insights.
- Use performance data to iterate on model routing, prompts and content strategy; implemented subscription billing and webhooks and led go-to-market.
- Work agentically: write the PRD, functional design and technical design documents first, then have AI agents build from them. The support system runs on a RAG pipeline.

Clinical Advisor, Greenway Health Aug 2022 – Oct 2026 | Remote

- Clinical lead for a new AI-first EHR from Aug 2025: defined provider personas and user goals, mapped end-to-end clinical workflows and identified where agentic automation could remove clinician burden.
- Wrote PRDs and feature requests from recurring client pain points and worked with product and engineering teams to get them built; many shipped to clients.
- Turned clinician needs into UX designs and interactive React prototypes built with AI tools, aligning product, engineering and clients before engineering handoff.
- Voice of the customer to product and design teams on a platform serving 100+ enrolled practices; features I shaped or advocated for shipped with positive client feedback.
- Owned implementations for close to 200 client practices: ran discovery on pain points, configured practice-specific workflows and trained 200+ providers, NPs, nurses and medical assistants.
- Patient Safety Committee, Functional Advisory Committee and Clinical Content Team: triaged defects and patient safety issues through stage-gate release.
- Presented product and AI feature concepts to clients and at the Greenway Engage provider conference.

AI Evaluation (Freelance), Outlier Dec 2025 – Present

- Write clinical prompts and expert reference answers, build scoring rubrics, and grade and compare ChatGPT, Gemini and Claude responses for clinical accuracy and task requirements.
- Design questions that challenge frontier models on clinical workflows and simulated scenarios, documenting where responses help and where they fail.

Founder, Pawlentine Beta testing (iOS and Android)

- Defined personas, user journeys and prioritisation for a pet social and matching app; building it hands-on with an analytics agent and event tracking. The support system runs on a RAG pipeline.

CLINICAL EXPERIENCE

- **Senior Resident, Emergency Medicine, Aster CMI**, Bengaluru (Apr 2021 – Jul 2022): quaternary care, Level 1 trauma centre.
- **ICU Registrar, HBS Hospital**, Bengaluru (May 2020 – Jan 2021): COVID ICU; trained 12+ nurses.
- **Occupational Health Physician, Ranger OH Clinic** (Jan – Apr 2021): wrote SOPs; trained 500+ people in emergency and safety protocols.
- **Teleconsultation Doctor, TATA 1MG** and freelance physician, India (Nov 2020 – present): virtual and in-person consultations, chronic disease management.

EDUCATION

MBBS, Kempegowda Institute of Medical Sciences (KIMS) 2020 | Bengaluru, India
